FACT-CHECKING AS A CITIZEN SERVICE

About me

- I'm **Tomás Rudich**, debunking Editor at Newtral since January 2021
- I worked as an editor at the german news agency DPA for eight years
- I was born in Argentina, I'm living in Spain (for more than 5 years). I have German and Italian family origins.

If you have any questions, you can write to me at: tomas.rudich@newtral.es

Or raise your hand...

About Newtral

- Media startup founded in January 2018 by spanish journalist Ana Pastor
- International Fact Checking Network (IFNC) member
- Different areas:
 - TV and audiovisual productions
 - Political fact-checking and debunking
 - Digital contents
 - Line of research based on Artificial Intelligence protocols

Youth, women and disinformation - Some facts

- **91%** of girls and young women surveyed are concerned about misinformation or disinformation on social media.
- **46%** of them feel sadness, depression, stress, worry or anxiety as consequence of the exposure to misinformation and online disinformation
- 7 out of 10 girls and young women have never received training -not even in school nor in the family environment- on how to identify disinformation
- **1 in 4 girls** feels less confident to share their opinions in social networks

THE TRUTH GAP (DES)INFORMADAS ONLINE

CÓMO LA DESINFORMACIÓN Y LA INFORMACIÓN ERRÓNEA ONLINE AFECTAN A LA VIDA, EL APRENDIZAJE Y EL LIDERAZGO DE LAS NIÑAS, ADOLESCENTES Y MUJERES JÓVENES

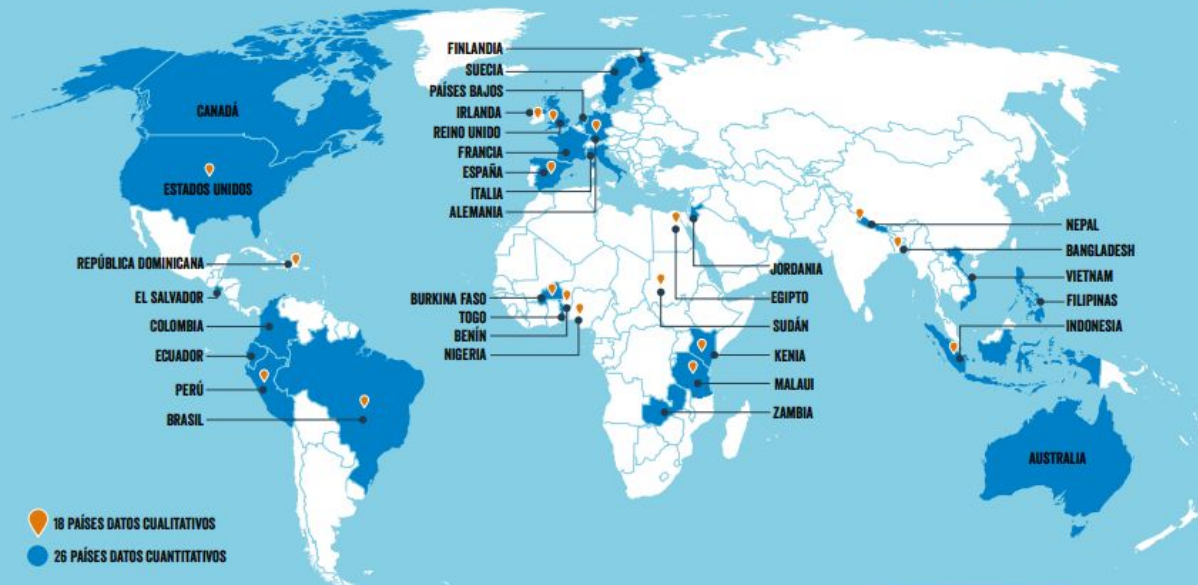

INFORMES "EL ESTADO MUNDIAL DE LAS NIÑAS"

Plan Internacional publicó por primera vez el informe "El estado mundial de las niñas" en 2007. El informe de 2021 analiza cómo la información errónea y la desinformación online afectan a la vida, el aprendizaje y el liderazgo de las niñas, adolescentes y mujeres jóvenes. Es el cuarto informe de una nueva serie que cada año examinará las conductas, actitudes y creencias que limitan la libertad y las oportunidades de las niñas, adolescentes y mujeres jóvenes en entornos o sectores específicos.

La investigación de este año se llevó a cabo en 33 países, con una encuesta realizada a más de 26.000 adolescentes y mujeres jóvenes en 26 países, así como con entrevistas cualitativas en profundidad en 18 países.

Para una descripción completa de la metodología de la investigación, véase la [página 43](#).

N.B. Los nombres de las niñas, adolescentes y mujeres jóvenes se cambiaron en este informe para garantizar su anonimato; en casi todos los casos, ellas mismas escogieron los nombres que deseaban usar. Las fotos de este informe no representan a las participantes en la investigación.

***But wait a minute...
what exactly is
disinformation?***

Disinformation, misinformation and malinformation

Disinformation is content that is **intentionally false** and designed to cause harm. It is motivated by three factors: to make **money**; to have **political influence**, either foreign or domestic; or to cause trouble for the sake of it.

Misinformation also describes false content, but the person sharing doesn't realize that it is false or misleading. Often a piece of disinformation is picked up by someone who doesn't realize it's false and that person shares it with their networks, believing that they are helping.

Malinformation. The term describes genuine information (private or restricted) that is shared with an intent to cause harm.

**SATIRE OR PARODY**

No intention to cause harm but has potential to fool

**MISLEADING CONTENT**

Misleading use of information to frame an issue or individual

**IMPOSTER CONTENT**

When genuine sources are impersonated

**FABRICATED CONTENT**

New content is 100% false, designed to deceive and do harm

**FALSE CONNECTION**

When headlines, visuals or captions don't support the content

**FALSE CONTEXT**

When genuine content is shared with false contextual information

**MANIPULATED CONTENT**

When genuine information or imagery is manipulated to deceive

Disinformation is not new, what is new is its capability of getting viral, getting spread and, with it, being potentially harmful.

Source: Kepios analysis; company advertising resources and announcements; CNNIC; Techrasa; OCDH; U.N.; U.S. Census Bureau. Data for **time spent** and **average number of platforms:** GWI (Q3 2021). See GWI.com for more details. **Note:** average platforms figure includes data for YouTube. **Advisory:** social media users may not represent unique individuals. Figures for reach vs. population and reach vs. internet users may exceed 100% due to duplicate and fake accounts, delays in data reporting, and differences between census counts and resident populations.

The world's most-used social platforms

Ranking of social media platforms by global active user figures (in millions)

Sources: Kepios analysis of (1) company announcements of monthly active users; (2) Platforms' self-service advertising resources; (3) Company announcements of daily active users (note that monthly active user figures may be higher). **Advisory:** Users may not represent unique individuals. **Comparability:** Platforms identified by (*) have not have published updated user figures in the past 12 months, so figures are less representative. Base changes and methodology changes; data may not be directly comparable with previous reports.

Favorite social media platforms

Percentage of **internet users aged 16 to 64** who say that each option is their “favorite” social media platform

Source: GWI (Q3 2021). See [GWI.com](https://www.gwi.com) for full details. **Notes:** Only includes users aged 16 to 64. Survey respondents could choose from other options not shown on this chart, so values may not sum to 100%. YouTube is not available as an answer for this question in GWI's survey. We report GWI's values for TikTok in China separately as Douyin, as per ByteDance's corporate reporting. **Comparability:** Versions of this chart that featured in our previous reports did not include data for China, so values are **not comparable**.

First “fact-checkers”

Perhaps the earliest published use of the phrase “fact-checker” can be found in a **TIME** advertisement in a **1938** issue of *Colliers*, which mentions the expansion of “its investigators and fact-checkers from ten to twenty-two.”

Source:

[Here's how early fact-checkers were able to do their job before the Internet \(Time Magazine\)](#)

“Because it has no political axe to grind, because its style is brief, clear, interesting, because its news is so organized that a mind trained or untrained can grasp it with minimum effort, **TIME** should appeal to every man or woman who has the slightest interest in the world and its affairs.” Thus the young editors wrote of unborn **TIME**.

Today **TIME**'s original 18,000 subscribers have grown to 700,000, its editors from two to thirty-one, its news service from nothing to **TIME**'s own 448 correspondents plus the world network of A. P. and U. P., its researchers and fact-checkers from two to twenty-five, its reference files from a few envelopes to over 100,000 separate subjects, its cost per printed word from 2¢ to over 20¢.

almost frozen. He was a large man with a broad swarthy face and dark restless eyes. He lighted a cigarette and let it hang in one corner of his mouth, squinting through the up-curling smoke.

“I got something wrong with the car. You keep a mechanic here at night?”

“Not regular,” George said. “I do a lot of work though. I guess I could take care of it. That is, if you didn’t want to wait till morning.”

“You all alone here?”

“Ten to eight.”

The big man took the cigarette from his mouth. “Gets pretty lonesome, I guess.” He blew smoke up at the light. “People drop in during the night, I guess. I guess the cop on this beat comes in sometimes.”

“There isn’t any cop,” George said.

He went on to explain that. The only peace officer they had was a town constable. He was sixty-five years old and he had a bad leg from stopping a slug in the Spanish-American War, and if you called him up for anything after eight o’clock at night he’d say, “I’ll see about it in the morning,” and go back to bed.

The stranger said, “Well, that’s nice, ain’t it?” He threw the cigarette in the stove. “I guess we better take a look at the car. It’s missing pretty bad.”

Pioneers of fact-checking

Pioneers of fact-checking

Bill Adair. Politifact.com

Pulitzer Price 2009

Truth-O-Meter

Establish a method and recognition (2009)

The moment for the recognition of fact-checking as an important part of journalism was in 2009, when PolitiFact received the [Pulitzer Prize](#). They [won the award](#) for their coverage of the 2008 presidential elections in the United States, "separating rhetoric from truth".

What Politifact did was to **establish a method**. The novelty was that they followed a procedure, which is the same one that almost all verification platforms follow nowadays.

Rating to classify their verifications based on a **"Truth-O-Meter"** on which category each statement falls into (true, false, half true, pants on fire ...). This brought the audience closer and clarified what fact-checks were.

The “second wave” (2016): from political fact-checking to debunking

A **first wave** was kick-started by the 2009 Pulitzer Prize assigned to PolitiFact.

The **second wave** of fact-checking projects emerged following the global surge in so-called ‘fake news’. The term describes entirely fabricated sensationalist stories that reach enormous audiences by using social media algorithms to their advantage.

This second wave (2016) often concentrated as much on fact-checking public claims as debunking these viral hoaxes. Debunking is a subset of fact-checking and requires a specific set of skills that are in common with verification.

Source: Journalism & Disinformation (UNESCO)

“Second wave”: debunking

'Post-truth' declared word of the year by Oxford Dictionaries

🕒 16 November 2016

<https://www.bbc.com/news/uk-37995600>

Political fact-checking | Debunking

	Political fact-checking (first wave)	Debunking (second wave)
Object of verification	Political speech	Viral hoaxes in social media
Origin	Politicians	Anonymous (not always) Anti-vaxxer Covid-denier
Detection	Listening	Social media monitoring
Tools	Official sources Databases Experts	Debunking tools Experts Official sources Databases
What to verify	Matters of public relevance, specific affirmation (not opinion, intentions or future prognoses)	Matters of public relevance, specific affirmation (not opinion, intentions or future prognoses)

Fact-checking organizations - IFCN

The **International Fact-Checking Network** (IFCN) was launched in 2015 to bring together the growing community of fact-checkers around the world and advocates of factual information in the global fight against misinformation

- More than 100 signatories nowadays
- Unit of the Poynter Institute (nonprofit media institute in St. Petersburg, US) dedicated to bringing together fact-checkers worldwide
- Spanish members of IFCN: Maldita, Newtral, EFE Verifica, Verificat
- African members of IFCN: Africa Check, Congo Check, FactCheckHub (Nigeria), FactSpace West Africa (Ghana and The Gambia)

Principles

- **Nonpartisanship** and fairness (checking all sides, follow the same process for every fact check and let the evidence dictate the conclusions)
- **Transparency of sources** (show the evidence, the tools or sources we used, and how we arrived at a certain conclusion)
- **Transparency of funding** (page on the web detailing sources of funding of the organization)
- **Transparency of methodology** (publish on the website a statement about the methodology it uses for the fact checks and where possible explains the reason for choosing the claim to check)
- **Corrections policy** (signatories publish their corrections policy and follow it scrupulously. They correct clearly and transparently, seeking so far as possible to ensure that readers see the corrected version)

IFCN - Code of principles

standards

Methodology and sources

- **Diversity of sources.** Each verification should have at least two different sources if possible.
- Use of **primary sources** (direct access) rather than secondary sources (indirect)
- Questioning information from a source when it is an **implicated party**
- We prioritize sources from **official or institutional** organizations (databases, official statistics, etc.). Or **experts** in their field.
- Three different **filters** within the team prior to publication.
- The objective is to **explain**, not to point out
- Presentation of **evidences**. The conclusion is the result from the evidences

What do fact-checkers verify?

- Matters of public/social/political relevance and interest.
- Content that is causing harm (public health, electoral process, scams, hate speech, etc).
- Content with a certain viralization (be careful not to amplify the hoax).
- Delimited object: specific affirmation or series of affirmations.

What fact-checkers do not verify?

- Opinions
- Political Rethoric
- Future prognoses
- Adjectivations
- Intentions
- Sarcasm or satire

Not only fact-check... **fact-checking is a citizen service**

- Fact-checking can have a positive impact on society as a whole by combating the damage that disinformation can cause in different areas: health, democracy, environment, coexistence...
- Verifiers also want to teach citizens how to verify so that they can be better equipped to combat disinformation (media literacy)

Fact-checking platforms - [Duke Reporter's Lab](#)
